11:41:48 From Ally Rolfhus to Laura Anderson(Direct Message):  
Laura, are you going to be driving the slides? do you want to start screen sharing the first slide or would you like me to?

11:42:57 From Laura Anderson to Ally Rolfhus(Direct Message):  
Marguerite will be driving the slides once she logs in

11:43:28 From Ally Rolfhus to Laura Anderson(Direct Message):  
okay, sounds good.

11:43:45 From Laura Anderson to Ally Rolfhus(Direct Message):  
She has an updated version with a few animation tweaks and new map image on slide 5

11:45:09 From Ally Rolfhus to Laura Anderson(Direct Message):  
okay

11:59:08 From Ally Rolfhus to Everyone:  
Welcome everyone, we will begin in just a minute

12:05:18 From Angela Chisholm to Everyone:  
I can't hear.

12:05:43 From Ally Rolfhus to Everyone:  
check your audio settings; you might want to drop off and rejoin

12:05:57 From Allison Crean Davis to Everyone:  
Are these the same cohorts over time or different cohorts?

12:07:01 From Elizabeth Braun to Everyone:  
To Dr. Roza's question: We are looking at where the funds are place in budget cells as well as which allowable activities the LEAs attribute portions of their allocations.

12:08:03 From Allison Crean Davis to Everyone:  
Got it, thank you Marguerite!

12:19:17 From Shelly Babler to Everyone:  
Funds may be obligated, just not claimed.

12:19:33 From Kara Flath to Everyone:  
I am pacing it so we don't over grow current service levels and not be able to sustain it.

12:20:07 From Jay SULLIVAN to Everyone:  
Districts are having a hard time hiring specialists/tutors to close gaps. They can't even hire substitutes.

12:21:12 From Kara Flath to Everyone:  
And echo Jay, we cannot even hire people to fill current positions.

12:21:37 From Michael Dennison to Everyone:  
my apologies

12:22:25 From Jay SULLIVAN to Everyone:  
Hoping districts will use funds for strategic investments (one-time).

12:23:50 From Michael Wiltfong to Everyone:  
Has there been any further consideration of extending timeline for ARP ESSER III?

12:25:25 From Shelly Babler to Everyone:

I see the value of sharing data on an SEA website, but these types of conversations (obligations or plans to spend funds when hiring is not successful) would not be represented in a chart on an SEA website. What are your suggestions on how to tell the "full story"?

12:26:29 From Wendi Fawns to Everyone:

What are others doing regarding 'stories'?

12:26:35 From Adam Tescher to Everyone:

I believe that the data that North Dakota is collecting is not reflective of what districts are doing to prevent, prepare, and respond to COVID.

12:28:13 From Elizabeth Braun to Everyone:

I would love to revise our collection questions but that would create an issue with analyzing historic data. I think the best bet is to look at the actuals and compare to the plans.

12:28:17 From Kate Bartlett to Everyone:

In CO, we also allocated funds from our state set-aside to a grant program supporting LEAs in telling their own ESSER stories. Info here: <https://www.cde.state.co.us/caresact/esser-learningtransparencytap>

12:32:53 From Kara Flath to Everyone:

Staff will not work more. They are burnt out. We are adding summer school, with additional stipends.

12:33:28 From Jay SULLIVAN to Everyone:

Hard to add time earlier (due to burnout), moving forward, it may be easier.

12:34:37 From Wendi Fawns to Everyone:

Connecting summer programming and partnerships with nonprofits into/bridging into fall academic gains maybe even through teachers getting professional development through the summer programs

12:37:05 From Jessica Swanson to Everyone:

Might be consumable instructional materials

12:38:50 From Allison Crean Davis to Everyone:

Is it important to right-size results from the analyses to \*when\* the dollars were disseminated? (Knowing that timing has varied quite a bit?)

12:47:47 From Janice Evans to Everyone:

It depends on how much they deviate from the plan.

12:47:54 From Wendi Fawns to Everyone:

Plan was/is needed

12:48:06 From Tyler Backus to Everyone:

Also remember that part of the compliance check for federal funds is that spending needs to be close to the application/plan that was submitted.

12:50:43 From Sheara Krvaric to Everyone:

Also remember people might be using the word "plan" to mean different things. There are public facing plans that ED required LEAs to develop for ARP, but then there are applications LEAs submit to states that are usually part of a grant management system. LEAs might be amending the stuff in the grant management system, but not the public facing plan.

12:53:34 From danielle netzer to Everyone:

For Wyoming, if the spending is not part of the plan districts would need to submit an amendment to their application reflecting that expenditure in their application and that it is

allowable. But like Sheara noted, districts might not change their public-facing ARP plan, like they might revise their Safe Return Plan which is mandated every six months.

12:54:18 From Wendi Fawns to Everyone:

Finance team may or may not be connected with program and data staff and the finance teams goal is a balanced budget not program impact.

12:56:12 From Tyler Backus to Everyone:

Is there a way to provide training to the LEAs in how to connect the spending to the students?

12:57:41 From Ida Batista to Everyone:

There are a lot of things that go on in between funding and student outcomes. That is a lot of real estate to cover in a few metrics.
